SUCCESSFUL LANDSCAPE PLANTING.

Our Landscape department designs plantings for all sorts of places.

We draw plans on scale, showing by the location of drives, walks, groupings and borders the effect the proposed planting will give you. We prepare the necessary specifications telling the name and number of plants required to produce the desired results

The charge for such work is very moderate and will be cancelled from the bill when the plan is accepted.

Give us your idea and we make you a design.

Estimates and information always cheerfully given.

SHADE AND AVENUE TREES.

A visit to our nurseries on College Avenue will afford you a great deal of pleasure if you are a lover of trees and plants.

The greatest satisfaction in buying your trees is to come and pick them out during the summer.

NOTE. If you want large trees to give shade now we have them. They are sturdy, straight and symmetrical and have been transplanted several times.

FLOWERING SHRUBS

FOR EVERY SEASON OF THE YEAR.

We have brought together the names of the best flowering shrubs to bloom in early spring from March until May 15th and in like manner those for spring and summer, separately, making a selection very easy. We give also a collection of shrubs for color effect in summer as well as winter. We have several hundred large specimen shrubs from 4-7 ft., fine and well developed. Write us for prices.

The figures in parenthesis indicate the height of the plant at maturity.

HARDY EVERGREENS.

It has been our aim for years to grow and import such varieties of evergreens as will produce a happy combination of shapes and colors for groupings on the lawn, in a corner of a building, etc.

This collection is the more valuable because every variety has been tested by us for years and proven entirely hardy and of great satisfaction all through New York State and the New England States. We do not grow any of the half hardy varieties, which are often seen starving in our estates and gardens.

All evergreens are packed with great care and shipped with a ball of earth.

NATIVE RHODODENDRONS AND KALMIAS.

PERFECTLY HARDY AS FAR NORTH AS BOSTON.

Grand effect can be obtained by planting these beautiful native evergreens in shady nooks around the house and in woodland or among wild plantings. In order to have sure success: The bed must be dug out 2 feet and filled with a mixture of good sod and leaf mould or peat. After planting give a good mulching of leaf mould or well rotten stable manure. Never rake the mulching away. In case your ground has no natural drainage, dig 2 feet deeper and fill this space with stone. Perfect drainage is essential to success. Prices per carload cheerfully given.

DOUBLE CHINESE HERBACEOUS PEONIES.

These grand double peonies are becoming more and more popular. Delicately fragrant, immense in size and with such exquisite shades of colors, they rival even the rose. Our fields draw annually hundreds of people to see their gorgeous blooms. Our long experience of the cultivation of this class of plants here as well as in Europe has enabled us to offer an unrivaled assortment.

We cordially invite everybody to call on us between June 3rd and June 15th and see what beautiful peonies we have.

NOTE. Those marked roots have 3-5 eyes.

Clumps are roots which have flowered in our field and are much stronger. The 3-4 years clumps hold in most cases a ball of earth and will give immediate effect.

Plant your peonies from Sept. 15th to Nov. 1st.

This is a photograph of one of the extensive tulip farms in Holland, from where we import our bulbs.

When our Mr. Oorthuys went over to Holland last year he brought over our first consignment of Tulips, Hyacinths, Daffodils, Crocus, etc.

We saw right away that the bulbs we received from our Holland house were far superior than those sent out in many cases from New York City.

We import no cheap "seconds." Ours are only first size, sound, plum bulbs. Give us a trial. Plant your Tulips, Hyacinths, Daffodils, Crown Imperials, Crocus, Lilies, etc., in the fall.
